Fieldwork quote clarifications

Apply these clarifications when comparing the three fictional options. This note takes precedence over conflicting proposal values.

Option B revised rate

Replace the Chennai rate of INR 820 in quote B1 with INR 850 per completed interview. All other quoted rates remain unchanged.

The cleaned and labelled data file remains included in the INR 24,000 setup charge. Record the extra processing charge as a confirmed zero.

Option C travel allowance

The travel charge remains unquoted. For planning only, use an editable INR 10,000 allowance. Label this as an estimate, not a confirmed quoted amount.

Keep the missing quoted travel amount blank or explicitly unquoted in the source extraction. Show the allowance separately in the budget.

Comparison rules

Use the same city sample and incentive assumptions for all options. Identify proposals by Option A, Option B, and Option C only.

A lower planning total does not establish the best supplier. Show the unconfirmed travel risk, delivery timing, and payment terms beside the cost comparison.

Source tracking

For each extracted rate or scope detail, record the source filename and section heading. Retain superseded values in a note so the change is visible.
